3 USB LED
Indicates charge dock is connected to your computer/laptop.

4 Power LED
Indicates the charge dock power is on.

5 Power Switch
Press switch to turn charge dock on and off.

6 AC/DC Power Pack Connector

7 SPT USB Ports
For connecting SPT devices (sold separately).

8 Storage Compartment
For storing AC/DC Power Pack when not in use.

Using the Charge Dock

- Plug dock into a power source with AC/DC Power Pack.

- Insert USB Cable into the charge dock and connect to USB port of computer.

- Turn charge dock on via the power switch.

- Firmly insert SPT device/s into SPT USB Port/s. Blue battery LED on SPT device will light up indicating it is connected and charging.

    To Download:

- Open the Bridge application on your computer.
  Find the bridge installer at **gametraka.zendesk.com**

- In Bridge, select download and the connected SPT devices will appear in the application window.

- When devices appear, select download and the data from the SPT devices will start to download. The SPT device LED's will start a light up cycle when downloading.

- Once the SPT devices are successfully downloaded, it is advised to erase the data from the devices in bridge to maintain optimum recording performance.
